WHAT IS DUAL ENROLLMENT?

Simply put, Dual Enrollment is the fast lane to a great future! Dual Enrollment allows Georgia high school students to be dually-enrolled in their high school and college level classes at the same time. By doing so, these students can earn literally years' worth of college credit and/or an associate degree, diploma or certificate. These students enjoy FREE tuition, FREE use of books and any college resource. Once enrolled, these students become part of the Coastal Pines Technical College family.
